

## **CLAIMS**

What is claimed:

1. A dental hygiene organizing and storage apparatus for dental hygiene equipment, comprising:

a front surface and a rear wall spaced from each other a distance suitable for placement of the organizing and storage apparatus within a medicine cabinet;

a first storage space for removable storage of a toothpaste tube;  
a second storage space for removable storage of a container of dental floss;

a third storage space for removable storage of a plurality of toothbrushes in isolation from one another; and

a drip tray disposed below the third storage space.

2. The dental hygiene organizing and storage apparatus of Claim 1 wherein the first storage space has a retainer wall with a slot there through to receive an axle of a toothpaste extractor.

3. The dental hygiene organizing and storage apparatus of Claim 1 wherein the third storage space includes:

individual supporting structures for storing the plurality of individual toothbrushes; and

a separating partition between each of the individual toothbrushes.

4. The dental hygiene organizing and storage apparatus of Claim 1 wherein the drip tray is removable.

5. The dental hygiene organizing and storage apparatus of Claim 1 wherein the storage space for the removable storage of a container of dental floss has a side slot providing finger access to the dental floss container.

6. The dental hygiene organizing and storage apparatus of Claim 1 wherein the front surface has a covering door hingeably attached thereto.

7. A dental hygiene organizing and storage apparatus for dental hygiene equipment, comprising:

- a front surface and a rear wall spaced from each other a distance suitable for placement of the organizing and storage apparatus within a medicine cabinet;

- a first storage space for removable storage of a toothpaste tube;

- a second storage space for removable storage of a container of dental floss;

- a third storage space for removable storage of a plurality of toothbrushes in isolation from one another;

- a fourth storage space for removable storage of a bottle of dental related fluid such as mouth rinse; and

- a drip tray disposed below the third storage space.

8. The dental hygiene organizing and storage apparatus of Claim 7 wherein the first storage space has a retainer wall with a slot there through to receive an axle of a toothpaste extractor.

9. The dental hygiene organizing and storage apparatus of Claim 7 wherein the third storage space includes:

individual supporting structures for storing the plurality of individual toothbrushes; and

a separating partition between each of the individual toothbrushes.

10. The dental hygiene organizing and storage apparatus of Claim 1 wherein the drip tray is removable.

11. The dental hygiene organizing and storage apparatus of Claim 7 wherein the storage space for the removable storage of a container of dental floss has a side slot providing finger access to the dental floss container.

12. The dental hygiene organizing and storage apparatus of Claim 7 wherein the front surface has a covering door hingeably attached thereto.
